<p style="text-align:center">**Searching using the Summon discovery tool**</p>
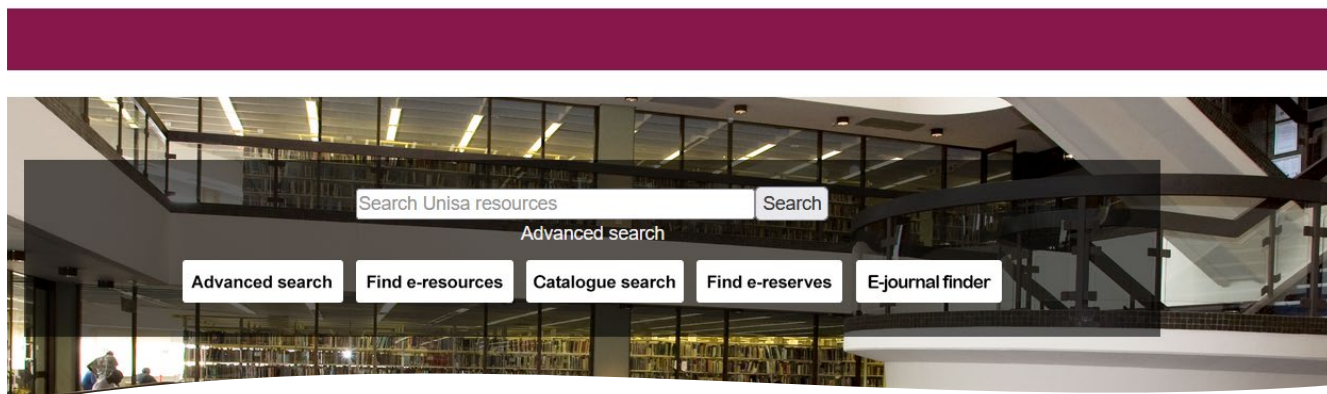

1. Accessing Summon discovery

There are two ways to access Summon:

1.1 Go to the library web page at https://www.unisa.ac.za/sites/corporate/default/Library
1.1.1 Enter your search terms in the Summon search box indicated with **Search Unisa resources** and click Search:

1.1.2 From the library web page, click the Catalogue search button- see the above screenshot.

1.1.2.1 On the catalogue web page, enter your search terms in the Summon search box indicated with **Search Unisa resources** and click Search.

When entering the search terms in the search box, a list of search terms will be given:

You can choose one of the listed search terms and then click Search. Or you can press Enter on the keyboard to use your own search term/s.

2. The Summon results page

After using one of the above two search methods, you will be directed to the Summon results page:

You have started a new search. All filters, date restrictions, keywords and other elements of your previous searches have been cleared. If you want to include filters in any subsequent searches or limit your results in any way you will need to set them again.

Note the following on the Summon results page:

2.1   The list of resources in the middle of the page:

Abstract

How can we, analysts, evaluate whether analysis is generating transformations in our patients? The IPA Project Committee on Clinical Observation and Testing offers a tool: The Three-Level Model for Observing Patient Transformations (3-LM); a guide for refining, conceptualizing, and systematizing clinical observations about patient transformations. It seeks to enhance clinical observations, making them more accurate and more useful for theory testing and theory building through a systematic analysis of clinical material. Time for Change: Tracking Transformations in

2.5   Definition of the search term:

To the right of the page there might be a dictionary definition of the search term, depending on the term searched:

> From Cambridge
> Dictionary of Sociology

Psychoanalysis

This refers to the type of psychotherapy that was founded by Sigmund Freud. In psychoanalysis the therapist, or analyst, seeks to aid patients to recognize their unconscious motivation. According to psychoanalysts, all people have unconscious desires and thus everyone would benefit from undergoing psychoanalysis. The term psychoanalysis is also sometimes used to describe the ideas of Freud and his followers

2.6   Refining your search

To the left of the page, there are options to refine your search. These options are the following:

2.6.1   Refine your search:

There are four options to refine your search before or after you perform the search. Tick one or more of the below boxes:

Refine your search

☐ Add results beyond your library's collection

Upon choosing resources that are not part of the Unisa library collection will be included.

☐ Full Text Online

This option will give you full text resources from the Unisa library collection. No print material eg. books will be included

☐ Scholarly & Peer-Reviewed

This option will give you peer-reviewed resources from the Unisa library collection.

☐ Library Catalog

This option will give you resources from the Unisa library catalogue. It will include print and e-books

Example: choose **Full Text Online** and **Scholarly and Peer-Reviewed**:

Selected ✓   **Clear all**

Full Text Online ✗   Scholarly & Peer-Reviewed ✗

> Note that your selection is displayed here.

Refine your search

☐ Add results beyond your library's collection

☑ Full Text Online

☑ Scholarly & Peer-Reviewed

☐ Library Catalog

Apart from the above four options to refine or filter your search, there are also the following ways to refine your search. Please note that to scroll between the five groups of filters, use the mouse wheel to scroll just to the right side of the filter groups. To scroll within a filter group eg. Content type, use the mouse wheel to scroll within the list of filters or click and drag the scroll bar.

2.6.2   Content type:

Choose one or more content type to limit your search:

Content Type ③   Sort ▾

🔍 Content Type Filter

☑	Journal Article	613K
☐	Book Review	13K
☐	Book Chapter	12K
☑	Newspaper Article	12K
☑	Book / eBook	11K

> Use sort to eg. sort the content types alphabetically

> Type in a part of a content type and only the relevant content types will be listed

Note that you can also choose a content type and hovering the mouse pointer on the specific content type, it will give the option to Exclude that specific content type:

To exclude the chosen content type, click ✗ Exclude to exclude it. To remove the exclusion, click on ✗ Excluded :
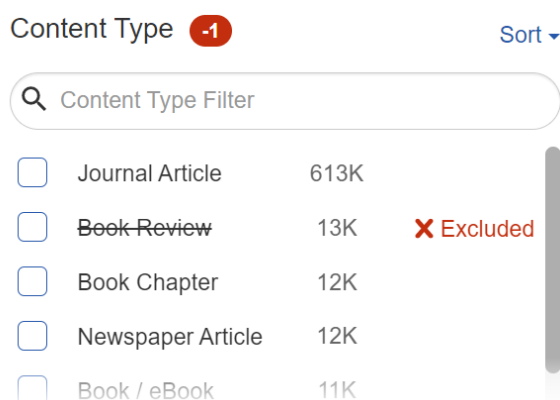

You can also do a search for a specific content type

2.6.3 Results can be refined by using the Publication Date filter:

By choosing 1, 3, 5 or 10 years, the results can be refined to fall within one of those parameters:
By clicking ✓ , a customised date range can be chosen. Only resources within the date range will be listed:

2.6.4 Discipline:

This filter enables you to limit to one or more discipline or broad academic subject area. Note that disciplines can also be excluded and sorted. Searches can also be done for disciplines:

Discipline **1**   Sort ▾

☐ medicine	30M
☑ engineering	26M
☐ business	15M
☐ economics	14M
☐ chemistry	9.8M

2.6.5   This filter will enable you to limit to one or more subject. Note that subjects can also be excluded and sorted. Searches can also be done for subjects:

Subject Terms **2**   Sort ▾

☑ chief executive officers	4.3M
☐ coaches & managers	3.1M
☑ computer software industry	4.8M

2.6.6   This filter will enable you to limit to one or more languages. Note that languages can also be excluded and sorted. Searches can also be done for subjects:

Language **1**   Sort ▾

☑ English	9.1M
☐ Español	1.8K
☐ Français	1.6K
☐ Deutsch	1.2K
☐ Urdu	647

2.6.7   This filter will enable you to limit to one or more library locations. Note that library locations can also be excluded and sorted. Searches can also be done for library locations:

Note that you can choose option/s from different filter groups and the "Refine search" options simultaneously to refine or filter the search results.

2.7   Performing an advanced search:

To perform an advanced search, click **Options** in the search box:

The following page will appear:

Clicking **All Fields** gives a list of possible search fields to choose from:
On the advanced search page, you can also use Boolean operators in your search by choosing AND, OR, NOT:
The above-mentioned filters in 2.6.1-2.6.7 are also available on the advanced search page. By choosing the relevant filters with the **All Fields** and the **Boolean operators** and clicking **Search**, you can perform a more advanced search:

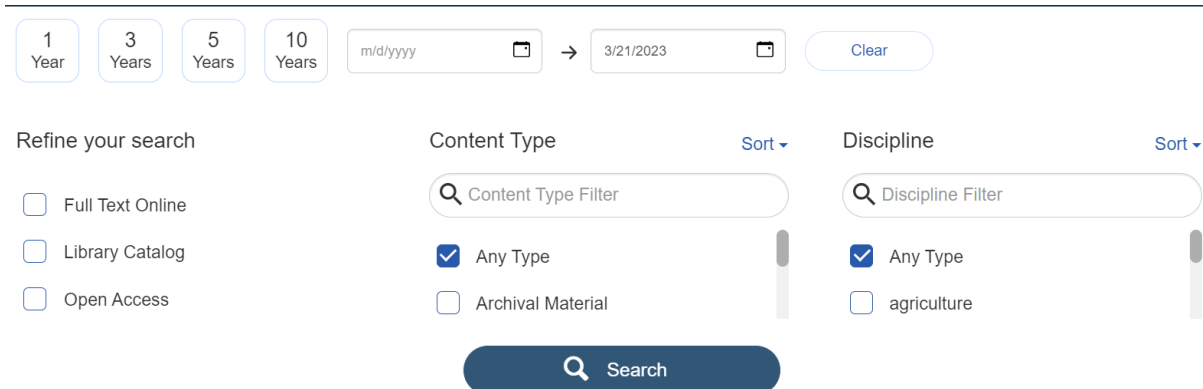

2.8   Accessing the resources in the search result:

The resources can be accessed as follows:

2.8.1   Example of resource available in print and e-book formats:

4 Time for change: tracking transformations in **psychoanalysis**...
by Altmann de Litvan, Marina

Psychoanalytic ideas and applications series., 2014, 1

Abstract

In this paper, I discuss the importance of conducting experimental research in managerial accounting and provide a framework for understanding and assessing the contributions of research in this area. I then use this framework to organize, integrate, and evaluate the existing experimental managerial accounting research. Based on my review and synthesis of
