

CIB Technology Graduate Programme

In an ever-changing global landscape, our ability to deliver cutting edge financial products and services on digital platforms, is key to the success of our franchise. CIB Technology is the backbone of the Corporate Banking businesses of Global Markets, Transaction Banking and Investment Banking. The intense, high-performance environment of Global Markets and Transaction Banking makes partnering with these areas particularly exciting. As the technology partner, the solutions we provide enable the processing of multi-million-rand transactions by these businesses. Additionally, CIB Technology empowers our business with a technology landscape that services non-retail customers which include Banks, public institutions, corporates, and asset managers to name a few and facilitates various transaction types, from high frequency trading (Algorithmic trading) with low values, to low frequency trading, high value payments to complex structured products.

Applications open until: 31st May 2024
